Education

Master of Science in Information Systems , Northeastern University	2022 - 2024
Relevant Coursework	Application Engineering Development (In JAVA), Web Design, UI/UX, Data Management and Database Design, Web Tools and Development, and Cloud Computing
Bachelor of Engineering in Computer Science Engineering , Nagarjuna College of Engineering and Technology	2016 - 2020

Experience

Software Developer , Murmuration Solutions Private Limited, Bangalore	Jun 2020 - Jul 2022
Web Application Development	
<ul style="list-style-type: none">Built a responsive web application Gaggle Online from scratch using React JS, Redux, and Axios for communicating with REST APIsAnalyzed user requirements and built reusable components and optimized the web pages to improve speed and performance by 57%Designed 20+ wireframes using Figma and converted them into reusable UI components using Material UIImplemented Google Analytics to monitor site traffic and improved the site engagement by 48% using the Search Engine Optimization	
Mobile App Development	
<ul style="list-style-type: none">Remodeled and added several features using React-Native, Redux, and several other third-party librariesImplemented firebase storage and React Navigation and assisted in manual testing of the app	
Software Developer Intern , Murmuration Solutions Private Limited, Bangalore	Mar 2020 - Jun 2020
<ul style="list-style-type: none">Quickly adapted to new language and framework. Applied the knowledge to daily tasks, improving efficiency and speed of the student module by 65%Interacted with the development team and assisted in the design implementation and manual testing of the product	

Projects

Hospital Management System

- Role-based access to different operations involved in the hospital eco-system
- End-to-end management solution built for smoother performance in a hospital setting using JAVA, JAVA Swing, and MySQL

Menu Masters

- Developed the web application using JavaScript and React and server-side language Node JS and Express JS. Used MongoDB as a persistent database
- Implemented CRUD operations using RESTful routes and developed full log-in functionality
